JAVA LAB DA 4 part 1

Arshdeep Singh Bhatia 19BCB0086

Exercise -1

Write a java program to count the occurrence of a particular word in a file. Assume that the files are text files. Write each file name, along with the number of occurrences in that file, to standard output. If an error occurs while trying to read from the files, you should print an error message for that file.

ANS
Make 2 files 1 demo.txt file and 1 code file in same directory

CODE

```java
import java.io.BufferedReader;
import java.io.FileReader;
import java.io.IOException;
import java.util.Scanner;

public class fileread
{
    public static void main(String[] args) throws IOException {
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter the word to be searched");
        String wordtofind=sc.next();
        sc.close();
        String line;
        int count = 0;
        FileReader file = new FileReader("demo.txt");
        BufferedReader br = new BufferedReader(file);
        while((line = br.readLine()) != null) {
            String words[] = line.split(" ");
            for(int i=0;i<words.length;i++){
                if(words[i].equals(wordtofind))count++;
            }
        }

        System.out.println("Number of words present in given file: " + count);
        br.close();
    }
}
```

DEMO.txt

java is a programming language.

java test file .

blah blah blah .

OUTPUTS

1. JAVA

```
PS D:\drives\java>  & 'c:\Users\arshd\.vscd
 Files\Java\jdk-15.0.2\bin\java.exe' '--ena
f7782f\bin' 'fileread'
Enter the word to be searched
JAVA
Number of words present in given file: 0
```

2. java

```
PS D:\drives\java>  & 'c:\Users\
 Files\Java\jdk-15.0.2\bin\java.
-cp' 'C:\Users\arshd\AppData\Roa
f7782f\bin' 'fileread'
Enter the word to be searched
java
```

3. blah

```
Enter the word to be searched
blah
Number of words present in given file: 0
PS D:\drives\java>  d:; cd 'd:\drives\java'
launcher.bat' 'C:\Program Files\Java\jdk-15
'-Dfile.encoding=UTF-8' '-cp' 'C:\Users\ars
edhat.java\jdt_ws\java_bbf7782f\bin' 'filer
```

4. if file demo.txt deleted

```
PS D:\drives\java>  d:; cd 'd:\drives\java'; & 'c:\Users\arshd\.vscode\extensions\vscjava.vscode-java-debug-0.32.1
launcher.bat' 'C:\Program Files\Java\jdk-15.0.2\bin\java.exe' '--enable-preview' '-XX:+ShowCodeDetailsInExceptionM
'-Dfile.encoding=UTF-8' '-cp' 'C:\Users\arshd\AppData\Roaming\Code\User\workspaceStorage\3fef2da13a4246926e1991e09
edhat.java\jdt_ws\java_bbf7782f\bin' 'fileread'
Enter the word to be searched
let

```

Write a java program to display the output as shown below.

Name : Rajesh

Location : Chennai

Mobile : 9XXXX 89XXX

A text file contains data about several employees. Each line contains the name, Location and Mobile number of an employee. Semicolon is used to delimit these data items. Read these data and use appropriate string methods to print all the employee details using IOs.

```java
CODE FILE

import java.io.BufferedReader;
import java.io.FileReader;

public class rajeshoccur {
    public static void main(String[] args) throws Exception{
        String line;
        FileReader file = new FileReader("demo1.txt");
        BufferedReader br = new BufferedReader(file);
        while((line = br.readLine()) != null) {
            String words[] = line.split(";");
            for(int i=0;i<words.length;i++){
                String data[] = words[i].split(",");
                    System.out.println("_____");
                    System.out.println("Name: "+data[0]);
                    System.out.println("Location: "+data[1]);
                    System.out.println("Mobile: "+data[2]);
            }
        }
        System.out.println("_____");
        br.close();
    }
}
```

change in demo1 causes new output

JAVA LAB DA 4 part 2

Exercise-3

Write a program that prompts the user to enter the name of the Team in the command line interface. Use the txt file from the link to read the no of matches played data for both home and away category. Display the win percentage both Home and away and write it as object in the local disk with the team name (csk.ser). Display the message Team Not found Info if the team name is not available.

Dataset Link:

https://drive.google.com/file/d/1nj8O5angva0lKtuHSWNG-bjUKveEG9m8/view?usp=sharing

Sample Output:-

Name of the Team : Chennai Super Kings

Home Win % : 57.8

Away win % : 60.5

CODE

```java
import java.io.BufferedReader;
